ETF STUDIES ON THE NSE INDIA WEBSITE

Article 2 | A simple guide to finding, screening and tracking ETFs

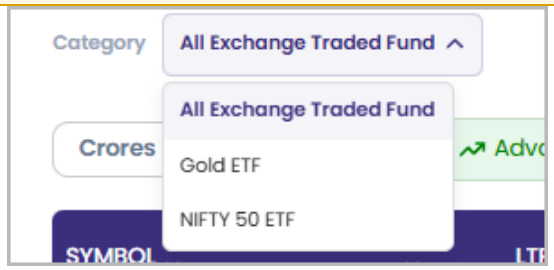

The NSE India website is a useful official starting point for studying listed ETFs. It allows investors to view ETF market data, compare important trading fields, download the list, and check newly listed products.

Step 1: Open the ETF Market Data Page

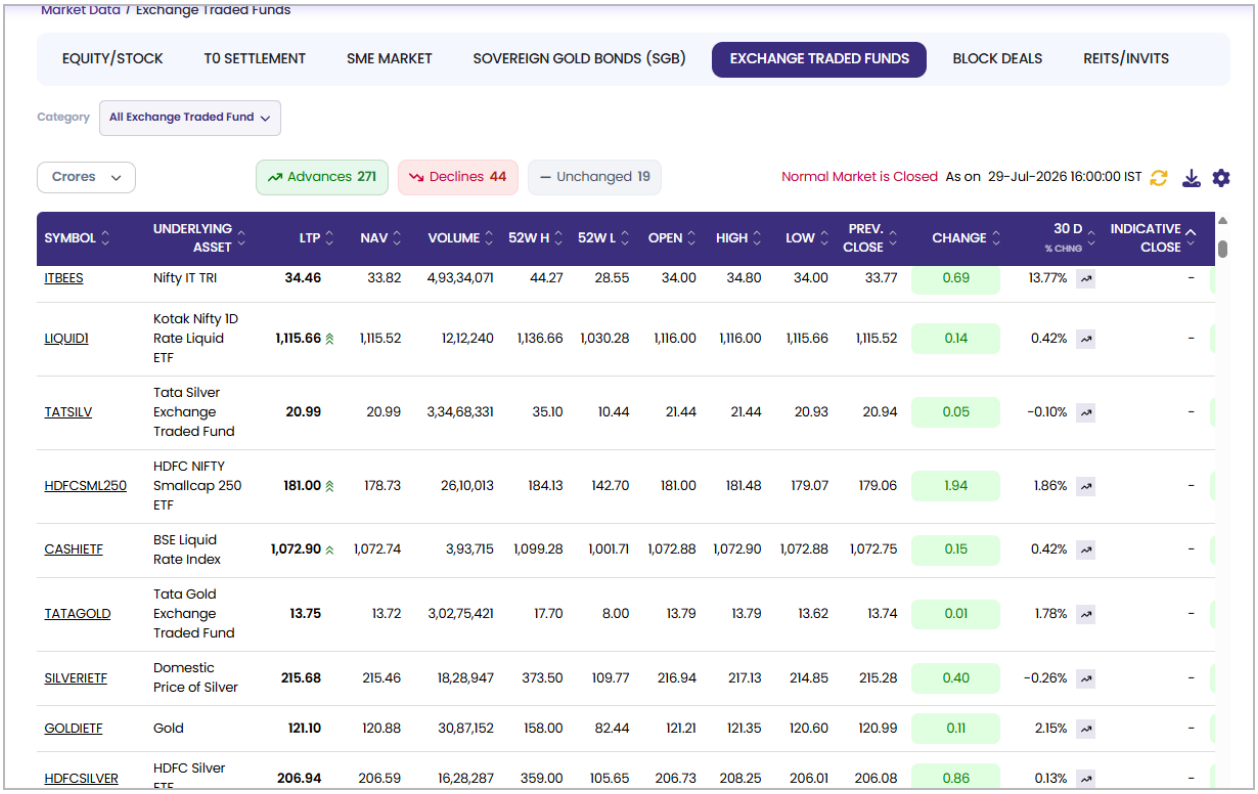

Navigation: NSE India Home → Market Data → Exchange Traded Funds
Direct link: NSE ETF Market Data https://www.nseindia.com/

From Market Data, select Exchange Traded Funds.

Use the category menu to view All ETFs, Gold ETFs or NIFTY 50 ETFs.

SYMBOL	UNDERLYING ASSET	LTP	NAV	VOLUME	52W H	52W L	OPEN	HIGH	LOW	PREV. CLOSE	CHANGE	30 D % CHNG	INDICATIVE CLOSE
ITBEES	Nifty IT TRI	34.46	33.82	4,93,34,071	44.27	28.55	34.00	34.80	34.00	33.77	0.69	13.77%	-

The ETF market-data table can be sorted and scrolled to compare listed products.

How to Read and Use the ETF Table

Key fields

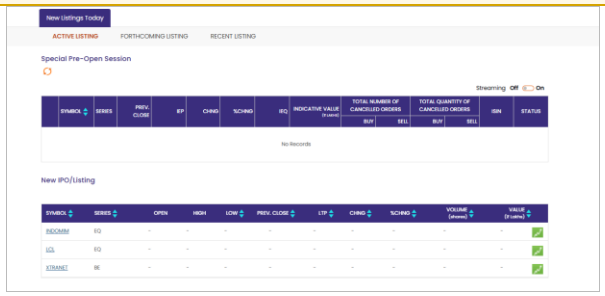

- Symbol: the ETF ticker used for buying and selling.
- Underlying asset/index: the benchmark or asset being tracked.
- LTP and NAV: compare the traded price with the fund value.
- Volume: shows how many units traded during the session.
- Open, High and Low: the day's price range.

Useful actions

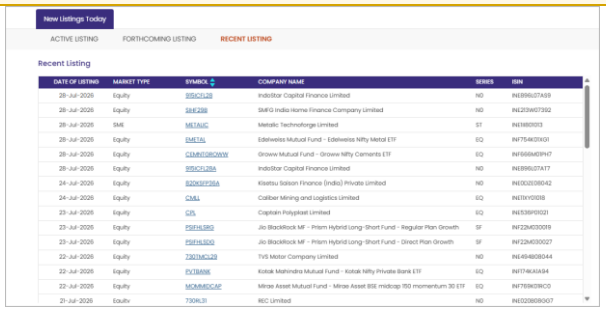

- Review 52-week high and low to understand the recent range.
- Sort the list by symbol, price, volume or other available columns.
- Use the download icon to export the ETF list to Excel.
- Apply filters in Excel by AMC, underlying index, volume or price.
- For expense ratio and tracking error, open the AMC fact sheet.

Step 2: Find Newly Listed ETFs

Navigation: NSE India Home → Market Data → New Listings → Recent Listing
Direct link: NSE Recent Listings https://www.nseindia.com/market-data/new-stock-exchange-listings-recent

The New Listings page contains Active, Forthcoming and Recent Listing tabs.

Recent Listing shows the listing date, symbol, company/fund name, series and ISIN.

A Simple Weekly ETF-Discovery Routine

- Check the Recent Listing page once a week, preferably on Friday evening or during the weekend.
- Look for names containing "ETF" and note the AMC, ticker, listing date and underlying index.
- Open the scheme's official fact sheet or SID before considering investment.

Important: The NSE page is an excellent discovery and screening tool, but a new listing is not automatically an investment recommendation. Always study the underlying index, liquidity, expense ratio, tracking quality and risk.
