HOW TO STUDY BSE INDICES FOR ETF RESEARCH

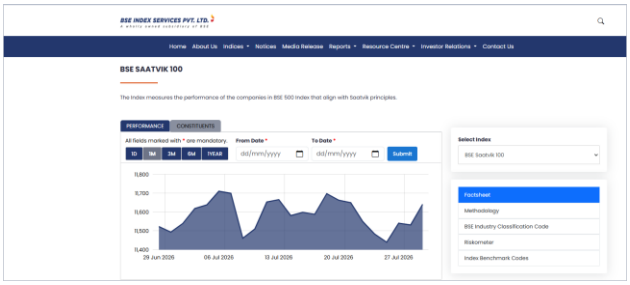

A simple one-page guide to using the official BSE Indices website

The BSE Indices website helps investors study the underlying indices followed by many ETFs. You can explore index categories, review performance and constituents, and download the official fact sheet.
Official link: https://www.bseindices.com/

Navigation: BSE Indices Home → Indices → Select a category → Choose the required index

Choose from market-cap, sector, thematic, strategy, sustainability and other index categories.

Open an index page to view performance, constituents and the Fact Sheet link.

Step-by-Step Process

- Open the BSE Indices website and click Indices in the top menu.
- Select the required category, such as Market Cap, Sector & Industry, Thematics, Strategy, Sustainability, Volatility, Fixed Income or Hybrid.
- Click the index you want to study. The index page shows its description, performance chart and constituents.
- On the right-hand side, click Fact Sheet. A PDF opens with index methodology, launch/base date, number of constituents, weightings, returns, valuation data and other details.
- Use the fact sheet to understand the index before studying or investing in an ETF that tracks it.

What to Check in the Fact Sheet

- Index objective and underlying universe
- Number and concentration of constituents
- Historical returns and volatility
- Selection and weighting methodology
- Rebalancing frequency
- Top constituents, sector exposure and valuation ratios

Important: This portal is mainly for studying BSE indices. For an ETF's live price, NAV, trading volume, bid-ask spread, expense ratio and tracking error, also check the exchange market-data page and the AMC's official scheme documents.
